Director of IT

We're in search of a Director of IT to join our client's team at their corporate office in Boulder, Colorado. The primary function for this role is to manage the IT Infrastructure for their current and growing IT capabilities, by exercising a combination of industry and practical experience and best practices, and providing leadership to a growing team of IT professionals. This role will be expected to provide technical management and leadership in the completion of various IT projects. They are a fast growing company with global operations and a geographically distributed workforce. Only candidates that thrive in a fast paced, rapidly growing and evolving IT environment should apply.

If this sounds like the opportunity for you, click on the link below to email your resume. Make sure to tell us why you're the ideal person for the job.
