

Sr. Consultant

Founded in 2002, our client has established their company as an elite technology vendor known for continued innovation in the security information market. The company was admitted into the SC Magazine Innovator Hall of Fame in 2010 and is listed as a Red Herring Top 100 Technology Vendor. Based in sunny Colorado, they offer a culture which values its customers, employees and a balanced work/life environment. If you would like to work for an innovative, achievement-oriented product company, we welcome you to apply:

We are seeking a **Sr. Consultant** for the Professional Services team at the corporate office in Colorado. This position is responsible for delivering professional and technical services to customers. Although many services are delivered remotely, System Engineers will be expected to travel.

Qualified candidates will have proven experience implementing distributed software-based products. Experience in a variety of technologies including networking devices, security devices, operating systems, and databases is required.

If this sounds like the opportunity for you, click on the link below to email your resume. Make sure and include a note telling us why you're the perfect person for the job.
